ASSETS EVALUATED

- Complete factories
- Production lines
- Surplus machinery
- Restructuring and insolvency assets
- Relocation and lease-expiry equipment
- Transformers and power equipment
- Selected machinery packages
- Exportable industrial equipment

PRIORITY SECTORS

- Plastics and Polymer Processing
- Packaging and Printing
- Food and Agro Processing
- Metal Fabrication and Engineering
- Woodworking and Furniture
- Electrical Power Equipment and Transformers

FIVE-STAGE EVALUATION FRAMEWORK

01	Initial information review Review the location, inventory, condition, images, timeline and proposed sale structure.
02	Ownership and authority verification Confirm ownership and the submitting party's authority to share information and negotiate.
03	Technical and commercial assessment Assess identity, condition, completeness, recovery scope, logistics and commercial viability.
04	Project and partner approval Consider the verified opportunity with the relevant technical, commercial and investment participants.
05	Removal, logistics and handover planning Define approved responsibilities for disconnection, rigging, packing, transport and site handover.

EXECUTION MODEL

For approved transactions, SRMS Ventures may coordinate project-specific technical inspection, utility disconnection, dismantling, rigging, packing, transport, export and site-handover requirements through qualified local and cross-border partners under separately agreed responsibilities and terms.

SRMS Ventures does not represent every technical activity as an internally owned capability.

CROSS-BORDER REVIEW FOR ASSETS PROPOSED FOR INDIA

Where assets are proposed for import into India, the transaction review may include HS classification, applicable import policy, customs valuation documentation and inspection or appraisal by an eligible Chartered Engineer or equivalent professional, where relevant.

Requirements depend on the asset, condition, classification, documentation and applicable rules at the time of the transaction. No customs-clearance or import-eligibility guarantee is made.

ENVIRONMENTAL SAFEGUARD

Oil-filled transformers are considered only where ownership, oil status, environmental documentation, handling responsibility and lawful reuse or disposal routes can be established.

INFORMATION REQUIRED FOR PRELIMINARY REVIEW

- | | |
|---------------------------------------|--|
| • Facility and asset location | • Ownership or disposal authority |
| • Machinery inventory | • Asking price or sale structure |
| • Manufacturer, model and year | • Removal deadline |
| • Operating or shutdown status | • Site-access and lifting constraints |
| • Photographs and video | • Oil and environmental documentation where relevant |
| • Maintenance records where available | |

FUNDING LIMITATION

No unconditional funding claim is made. Financial participation is considered only for a verified opportunity following ownership, technical, commercial and project-partner review.

LEGAL NOTICE

This document is provided for preliminary business evaluation only. It does not create an agency relationship, exclusivity arrangement, purchase obligation, proof-of-funds commitment or binding offer. Any acquisition, inspection, dismantling, funding, logistics or site-handover scope is subject to due diligence, approval, technical feasibility and separately agreed written terms.
